PROFESSIONAL PROFILE

Junior DevOps Engineer with a strong foundation in **Infrastructure as Code (IaC)**, system automation, and software engineering. Experienced in optimizing deployment workflows using **Ansible** and **Python** at major corporations (Santander, Telefónica). Proficient in **Linux/Unix** environments and **Git** version control, with a deep understanding of compiled languages (C/C++) enabling smooth collaboration with development teams. Passionate about reliability engineering (SRE) and scalable infrastructure.

PROFESSIONAL EXPERIENCE

Telefónica Tech

Automation Engineer & Data Analyst (Internal Control)

- Workflow Automation:** Developed optimized **Python scripts** to automate complex data pipelines, reducing reporting latency from 1 day to real-time.
- Operational Efficiency:** Streamlined data ingestion processes from SAP, ensuring high availability and integrity for business-critical dashboards.
- Tooling:** Designed internal monitoring dashboards (Power BI) to visualize system performance and KPIs for stakeholders.

Madrid, Spain
Feb 2025 – Present

Banco Santander

Santander Start VI - Database & Infrastructure Team

- Infrastructure as Code (IaC):** Implemented **Ansible** playbooks to automate database deployments, drastically reducing manual intervention and deployment times.
- Release Management:** Managed lifecycle and configuration updates for critical systems, ensuring stability in production environments.
- Quality Assurance:** Executed technical QA plans and maintained documentation for infrastructure governance and compliance.

Boadilla del Monte, Spain
May 2023 – Dec 2023

ARITMOS

Systems Support Technician

- System Administration:** Administered Windows/Linux systems for 10 external clients, troubleshooting network and hardware issues.
- Incident Management:** Resolved technical tickets with a high success rate, maintaining service continuity for end-users.

Lérida, Spain
Feb 2021 – Sep 2021

Mobility Friends

IoT Developer (Erasmus+ Scholarship)

- Embedded Systems:** Programmed C++ solutions for hardware automation, managing the full development lifecycle.

Braga, Portugal
Aug 2020 – Sep 2020

EDUCATION

The Open University

BSc (Honours) in Computing & IT (Top-up) – Focus on Software Engineering

42 (Campus 42)

Software Engineering (Unix, C/C++, Algorithms, Git)

- Intensive training in low-level programming, memory management, and **Unix system architecture**.
- Mastery of **Git** flows and peer-review methodologies in a CI/CD-like environment.

London (Online)
Present
Madrid, Spain
Sep 2024 – Sep 2026

ISDI

Advanced Program in Digital Business

ELS Language Centers

English for Academic Purposes (Advanced Level)

CES, Escuela Superior de Imagen y Sonido

HND in Computer Science & Higher Technician in App Development (DAM)

Madrid, Spain
2023
California, USA
Jan 2024 – Aug 2024
Madrid, Spain
2021 – 2023

TECHNICAL SKILLS & LANGUAGES

DevOps & Cloud:

Scripting & Systems:

Development:

Soft Skills:

Languages:

Ansible (IaC), Terraform, Git (Version Control), Database Management.

Bash Scripting, Python (Automation), Linux/Unix Administration, Windows Server.

C, C++ (OOP Concepts), SQL, Algorithms, Data Structures.

Problem Solving, Analytical Thinking, Adaptability, Communication, Teamwork.

Spanish (Native), English (Advanced Professional Proficiency - ELS Certified).
